Preface

*Florida County Perspective* was developed in response to requests from individuals, the media, public agencies, and private businesses that needed a broad range of data for specific counties. Every effort has been made to provide the user with the most pertinent data available. Each county volume contains a locator map, a ranked data section and a historical data series section.

The rankings section contains over 850 current data items for Florida and the county as well as that county’s rank among all Florida counties. The data are arranged by subject matter within 13 broad areas of interest. In some cases, data for a county may be unavailable or may be withheld to avoid disclosure about individual firms. When this occurs, the county is not ranked and a dash will be found in the column denoting rank. Some data items are presented that apply to only a small portion of Florida’s counties. Footnotes applying to individual data items are found at the end of each section rather than at the bottom of each page. Users who require ranked data for several counties or who require a detailed picture of how all counties rank in a particular area are referred to *Florida County Rankings 2011*.

The historical profile was primarily produced from the Florida Economic Database, BEBR programs, and from data provided by the U.S. Bureau of Economic Analysis and the Florida Agency for Workforce Innovation. Annual data from 1981 through 2010 depict ten socioeconomic categories: population; households; housing (units); labor force; covered employment (jobs); sales; income; derivation of personal income; wages and salaries by industry; and wage and salary employment. Revisions to previous years have been made where applicable. A Florida historical profile is provided for comparison.

**Historical profile employment series.** Significant changes to how the covered employment and wages and salaries sections were made to the historical profile in recent years that bear discussion and caution. In 2004, we introduced the transition from the Standard Industrial Classification (SIC) system of reporting annual employment statistics to the North American Industry Classification System (NAICS). First introduced by the U.S. Census Bureau in the 1997 Economic Census to be consistent with the United Nations’ International Standard Industrial Classification system, NAICS reorganized industries into more meaningful sectors, particularly expanding the services industries classifications. NAICS groups the economy into 20 broad sectors; up from the 10 divisions previously reported using the SIC system. As a result of these significant changes, data are not comparable over time. Therefore, we include the SIC data in the historical series for reference purposes and for users who wish to reflect historical trends. Caution should be used when attempting to compare the current NAICS industry data to SIC data, particularly at the county level. Additional information on the transition from SIC to NAICS and its implication can be found on the U.S. Census Bureau Web site at www.census.gov.

*Florida County Perspective 2011* is available by download, e-mail, and on CD-ROM. Printed copies are no longer available. Visit our Web site at www.bebr.ufl.edu to order or contact us at (352) 392-0171 ext. 212 or at info@bebr.ufl.edu for additional information, or for other specific data needs. Users who require state data, city data, data comparing Florida to other states, or specific in-depth definitions for the data presented are referred to the *Florida Statistical Abstract 2011* and other publications of the Bureau of Economic and Business Research.

**Acknowledgments.** BEBR’s Information/Publications Services program staff has worked diligently to ensure accuracy of these data series. Eve Irwin downloaded and organized all of the current data files; updated, developed, and maintained links to other statistical publications and sources; prepared and organized the comprehensive footnotes; and supervised and managed statistical aide staff in detecting and resolving quality-control issues. I served as co-editor with Eve Irwin and managed general production, preparing the historical series, locator maps, and CD-ROM (including cover and inserts). Eve Irwin and Pamela Middleton coordinate orders and distribute the publication in the versions offered.

1/ Cost of a house as measured by the Florida Price Level Indices (FPLI). Based on sales of new homes; excludes mobile homes.
2/ Index from the BEBR Florida County Retail Price Index.
3/ Includes military mobile homes. Florida total includes agency office tags not distributed by county.
4/ Starts are compiled using monthly start ratios for monthly permit data. Some counties report annually and, although we can show the annual permits total, we are unable to compute and compile monthly starts for those counties.

## 3.00 Vital Statistics (Continued)

AIDS Acquired Immunodeficiency Syndrome.

A/ Includes data for mothers whose age was not stated.

B/ Live births per 1,000 females aged 15-44, April 1, 2010.

C/ Homemaker and companion service companies.

D/ Self-care limitation is defined as a person with two or more disabilities, including self-care limitations.

1/ Rates per 1,000 mid-year 2010 population estimates based upon 2000 census data.

2/ Births to females aged 15-19 per 1,000 female population.

3/ Persons designating "Hispanic" as a race were counted as white.

4/ Rate per 100,000 population, April 1, 2010.

5/ Deaths from homicides, suicides, and accidents to teens age 15-19 years per 10,000 population.

Note: Birth data are for births occurring to residents of the specified area regardless of place of occurrence.

(D) Data withheld to avoid disclosure of information about individual firms. (L) Less than $50,000, or a net loss.

6/ Includes the inventory valuation and capital consumption adjustments.

B/ Includes government payments, imputed income, and rent received.

1/ These data were derived by dividing each type of income by the total population of the area, not just the segment of the population receiving that particular type of income. All per capita figures are based on the U.S. Census Bureau population figures.

2/ Adjusted using the 2008 Florida County Retail Price Index.

3/ Includes the capital consumption adjustment for rental income.

4/ Farm proprietors in some counties reported losses which accounts for some nonfarm percentages in excess of 100 percent.

5/ Includes agriculture, hunting and other related activities.

6/ Includes warehousing.
### 5.00 Income and Wealth (Continued)

7/ Includes rental and leasing.  
8/ Includes scientific and technical services.  
9/ Management of companies and enterprises.  
10/ Includes waste management and remediation services.  
11/ Includes social assistance.  
12/ Includes entertainment and recreation.  
13/ Includes food services.  
14/ Except public administration.  
15/ Persons aged 60 and over with income below poverty level.  
16/ Persons aged 60 and over with income below 125 percent of the poverty level.

**Notes:**
- AFDC Aid to Families with Dependent Children. SSI Supplemental Security Income. DOEA Department of Elder Affairs.
- \(A\) \(A\) Includes adult family care home facilities, hospitals with skilled nursing units, and adult day care facilities.
- \(B\) \(B\) All active licenses as of June 5, 2011. Excludes delinquent active, involuntary inactive, and voluntary inactive licensed persons, and are not comparable to earlier years. Florida includes out-of-state, foreign, and unknown county data not distributed by county. Calculations based upon BEBR population estimates, April 1, 2011.
- \(C\) \(C\) Persons enrolled in both hospital insurance (HI) and supplemental insurance (SMI) programs.
- \(D\) \(D\) Persons aged 60 and over with incomes below 125 percent of poverty.
- \(1\) \(1\) Monthly payments per recipient. Calculated by the University of Florida, Bureau of Economic and Business Research.
- \(2\) \(2\) Includes disabled.
- \(3\) \(3\) Number of grandparents aged 30 and over living with grandchildren aged 18 and under.
- \(4\) \(4\) Number of grandparents aged 30 and over who are responsible for grandchildren aged 18 and under.

NAICS North American industry Classification System. Average monthly payroll for employment covered by unemployment compensation law. Data for 2010 are preliminary. Florida may include data not distributed by county. Only disclosable data are shown.

A/ FDIC-insured commercial and savings banks as of June 30, 2011.
B/ Florida excludes out-of-state and foreign.
C/ Florida includes out-of-state and foreign data not distributed by county. Architects and interior designers include individual and business licenses, and accountants include certified public accountants, firms, providers and courses.
D/ The Florida County Retail Price Index reflects the price level in each county relative to a population-weighted statewide average for August 2008. It measures price level differences from place to place in contrast to the consumer price index which measures price level changes from month to month.
E/ Reported to the Florida Department of Revenue by all types of firms for the purpose of tax payment. Florida includes out-of-state and reports that have not yet been allocated to counties.
F/ Professional, scientific and technical services. G/ Except public administration.

MCF Thousand cubic feet.

A/ Sample-based average estimated market value of land and buildings per farm.

B/ Average monthly private employment covered by the unemployment compensation law. Data are preliminary. Florida includes data not distributed by county.

C/ Excludes lemon and lime production.

D/ Florida landings and trips include inland/out-of-state landings from seafood dealers residing in inland counties or out-of-state who bought Florida produced seafood. Landings are recorded in the county where products first crossed the shore.

E/ Water area measurement figures reflect all water, including inland, coastal, territorial, new reservoirs, and other man-made lakes.

F/ In millions of gallons per day. Values may not be identical to the data reported or published by the water management districts due to differences in data collection procedures and categories used or revisions in reported values. Includes fresh and saline.

1/ Farm wage and salary employees as a percentage of all wage and salary employees.

2/ As a percent of total citrus. Includes temples, and naval oranges.

3/ As a percent of total citrus. Includes specialty fruits such as tangelo and tangerines.

4/ Ownership class data are a special case partial dataset and as published.

5/ Includes water withdrawn for livestock and agricultural irrigation as well as recreational turf grass and landscape irrigation.

B/ Any accident that results in death, disappearance of any person, injury requiring medical treatment beyond first aid, and/or property damage totaling more than $500. Damages include boats and personal watercraft.

C/ Florida includes data not distributed by county due to reporting practices involving tags outside the computer system and refunds.

D/ Includes auto-motorcoaches and camp trailer. These data are not comparable to those published in previous years.

E/ Data are for January 1 and are reported in county of driver’s mailing address. Includes restricted, operator, chauffeur, and commercial licenses. Excludes temporary permits.

F/ Includes gasohol. Data are for 2010 and are computed using April 1, 2010 population Census count.

G/ Florida includes data not distributed by county.

I/ Includes rental condominiums and transient apartment buildings which rent for six months or less.

---

6/ Expenditures presented at the county level for compensation, pension, education, and vocational rehabilitation reflect the dollar values of actual payments made to individuals.

7/ Excludes gasoline taxes. Florida includes data not distributed by county.

C/ Distribution of shared taxes by the Florida Department of Revenue to state and county governments. Duval county is the consolidated city of Jacksonville.

D/ Unaudited gross sales amounts.

1/ Compensation for service-connected disability; dependency and indemnity for service-connected deaths; pension for nonservice connected disabilities; and pension to surviving spouses and children.

2/ Medical expenditure includes services, administration, facility costs, educational and research support and other overhead. Excludes construction or other non-medical support activities.

3/ Based on BEBR population estimates, April 1, 2010.

4/ Based on BEBR population estimates, April 1, 2009.

5/ Includes fines and forfeits and other sources and transfers.

6/ Includes cultural, recreation, debt service, and other uses and interfund transfers and court related expenditures.

7/ Includes county government special service districts and independent special service districts.
